

1. What is recursion?

Answer: Recursion is when a function calls itself. It is used to solve repetitive problems.

2. What is inheritance?

Answer: Inheritance allows one class to use the properties and methods of another class. It supports code reuse.

3. What is polymorphism?

Answer: Polymorphism allows the same method to perform different tasks. It provides flexibility in OOP.

4. What is encapsulation?

Answer: Encapsulation combines data and methods into a class. It protects data from direct access.

5. What is abstraction?

Answer: Abstraction hides implementation details. It shows only the essential features.
