

1. What is a class and an object?

Answer: A class is a blueprint for creating objects. An object is an instance of a class.

2. What is the purpose of the self keyword?

Answer: self refers to the current object. It accesses instance variables and methods.

3. What is file handling in Python?

Answer: File handling is used to read and write files. It uses functions like open(), read(), and write().

4 What is PEP 8?

Answer: PEP 8 is Python's coding style guide. It improves code readability and consistency.

5. What is the difference between sort() and sorted()?

Answer: sort() modifies the original list, while sorted() returns a new sorted list. sorted() works with lists, tuples, strings, and other iterables.
