

Certainly! Here are the same **10 Python interview questions** in **simple, general English** that are easy to remember and explain in interviews.

1. What is Python?

Answer: Python is a simple and easy-to-learn programming language used to build different types of applications.

2. What are Python's key features?

Answer: Python is easy to learn, easy to read, works on different operating systems, and has many built-in libraries.

3. What is the difference between a list and a tuple?

Answer: A list can be changed after it is created, but a tuple cannot.

4. What is the difference between = and ==?

Answer: = is used to store a value, and == is used to compare two values.

5. What are Python variables?

Answer: Variables are used to store information or values in a program.

6. What are the basic data types in Python?

Answer: The basic data types are numbers, decimal numbers, text, true/false values, lists, tuples, sets, and dictionaries.

7. What is the difference between break and continue?

Answer: break stops the loop, while continue skips the current step and moves to the next one.

8. What is a function in Python?

Answer: A function is a block of code that performs a specific task and can be used again.

9. What is the difference between a for loop and a while loop?

Answer: A for loop repeats a fixed number of times, while a while loop repeats as long as a condition is true.

10. What is the purpose of the print() function?

Answer: The print() function is used to display the output on the screen.

These answers are suitable for **freshers, internship interviews, and campus placements** because they are short, simple, and easy to explain.
